## Overview

The FIPS certification for the SafeNet eToken 5110 FIPS will be sunset by January 2022 and will be moved from “Active” to “Historical” status. Although the FIPS certificate for the eToken 5110 FIPS will continue to be valid, after January 2022 these tokens can no longer be used in NEW procurements.

In view of this situation, and in order to ensure continued compliancy, Thales will discontinue the sale of the SafeNet eToken 5110 FIPS.

Instead of the SafeNet eToken 5110 FIPS, customers will be able to purchase the replacement products outlined in this document and detailed in the [“Replacement Products”](#) section.

Thales has developed a plan to ensure current customers a smooth transition in upgrading to the latest available Thales technology. If you have questions about this transition that are not addressed in this document, please contact your local account manager for more information.

## RMA

---

RMA & hardware replacements after the Last-Time-Buy (LTB) will be with replacement product. RMAs for products under warranty will be offered only if components are reasonably available. Hardware replacements where deemed appropriate after the Last-Time-Buy (LTB) will be with replacement products. Thales will continue to provide email support to the extent reasonably practicable without providing product releases and quality updates, and Thales provides no guarantee that a problem with the said product can or will be resolved. Thales will not guarantee Failure Analysis (FA) and Corrective Action (CA) reports on these products. Thales will review each unit returned on a case by case basis and determine what type of FA / CA is justified given the age and condition of the product.
