## Overview

The FIPS certification for the SafeNet eToken 5300 and 5300C is sunset since July 1, 2022 and is moved from “Active” to “Historical” status.

In view of this situation, and to ensure continued compliancy, Thales has already proposed replacement product with SafeNet eToken 5110+ FIPS; and will now discontinue the sale of the SafeNet eToken 5300 and 5300C.

Customers will be able to purchase the replacement products outlined in this document and detailed in the [“Replacement Products”](#) section.

Thales has developed a plan to ensure current customers have a smooth transition in upgrading to the latest available Thales technology. If you have questions about this transition that are not addressed in this document, please contact your local account manager for more information.

## Key Dates

The following are key dates in the End of Sale process:

Milestone	Date	Comment

## RMA

---

RMA & hardware replacements after the Last-Time-Buy (LTB) will be with replacement product. RMAs for products under warranty will be offered only if components are reasonably available. Hardware replacements where deemed appropriate after the Last-Time-Buy (LTB) will be with replacement products. Thales will continue to provide email support to the extent reasonably practicable without providing product releases and quality updates, and Thales provides no guarantee that a problem with the said product can or will be resolved. Thales will not guarantee Failure Analysis (FA) and Corrective Action (CA) reports on these products. Thales will review each unit returned on a case by case basis and determine what type of FA / CA is justified given the age and condition of the product.
